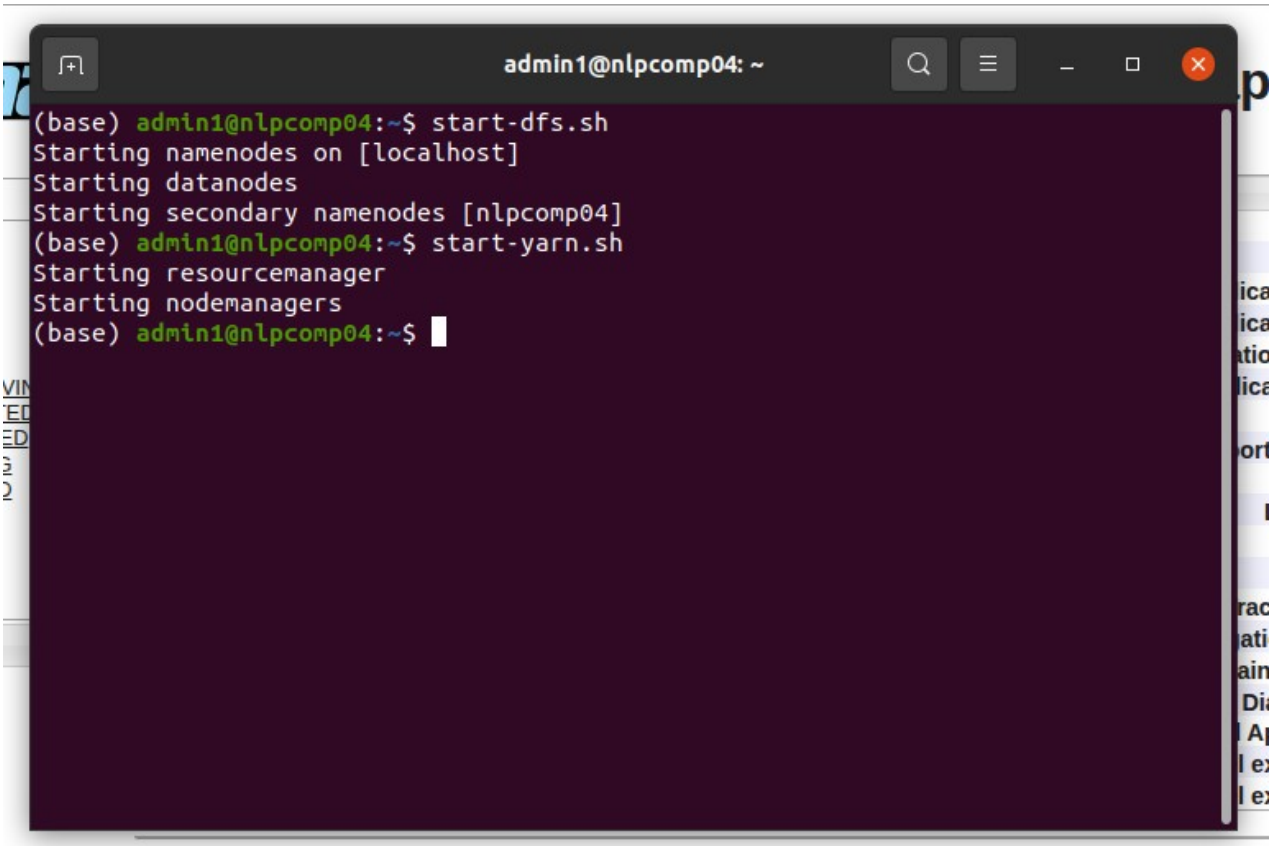
Assignment No.07

Aim:To configure a multi-node Hadoop cluster and process large datasets for business intelligence analysis.

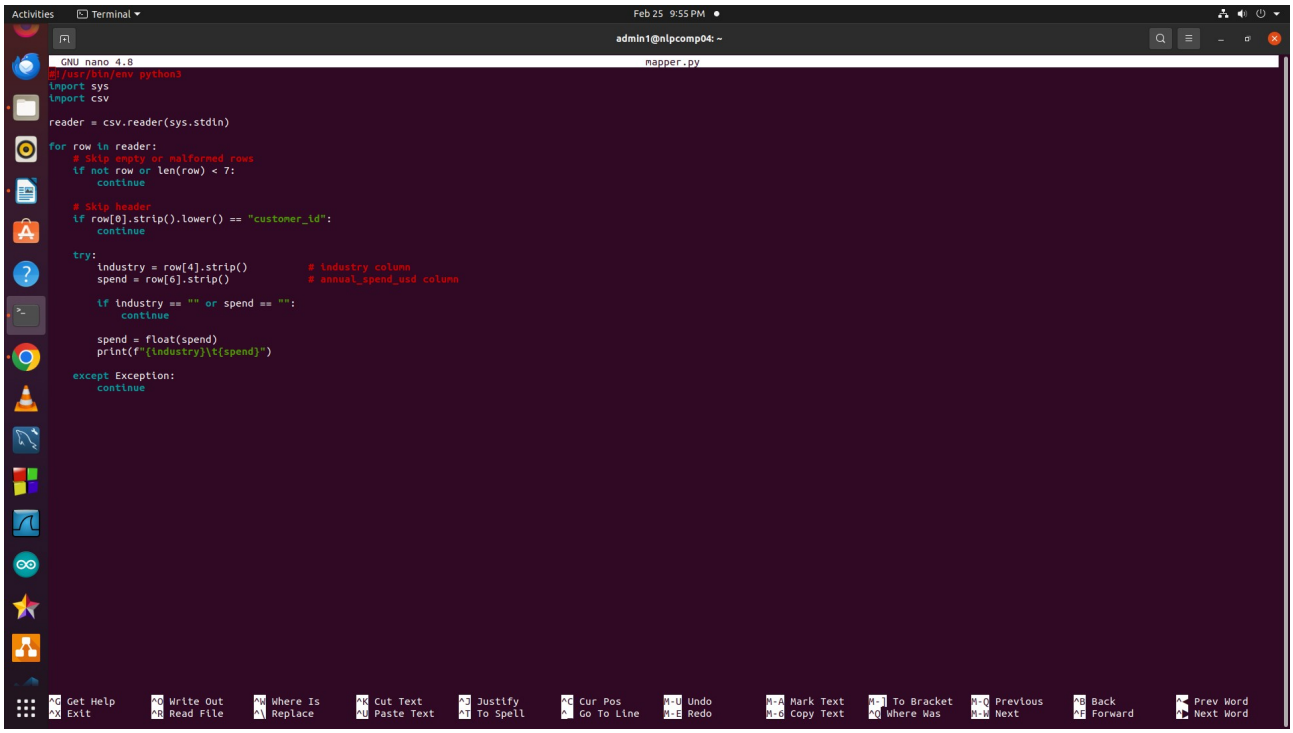
STEP 1: Start Hadoop

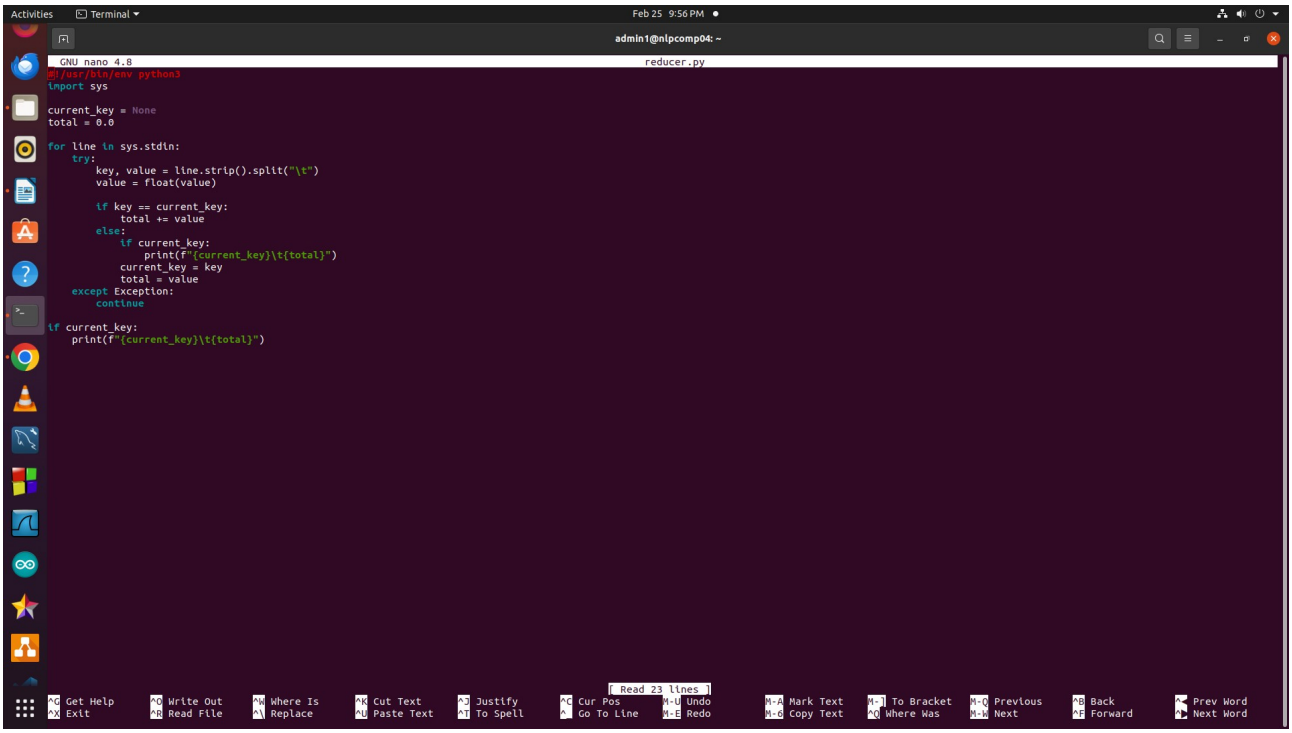


STEP 2: Create HDFS Directory & Upload Dataset

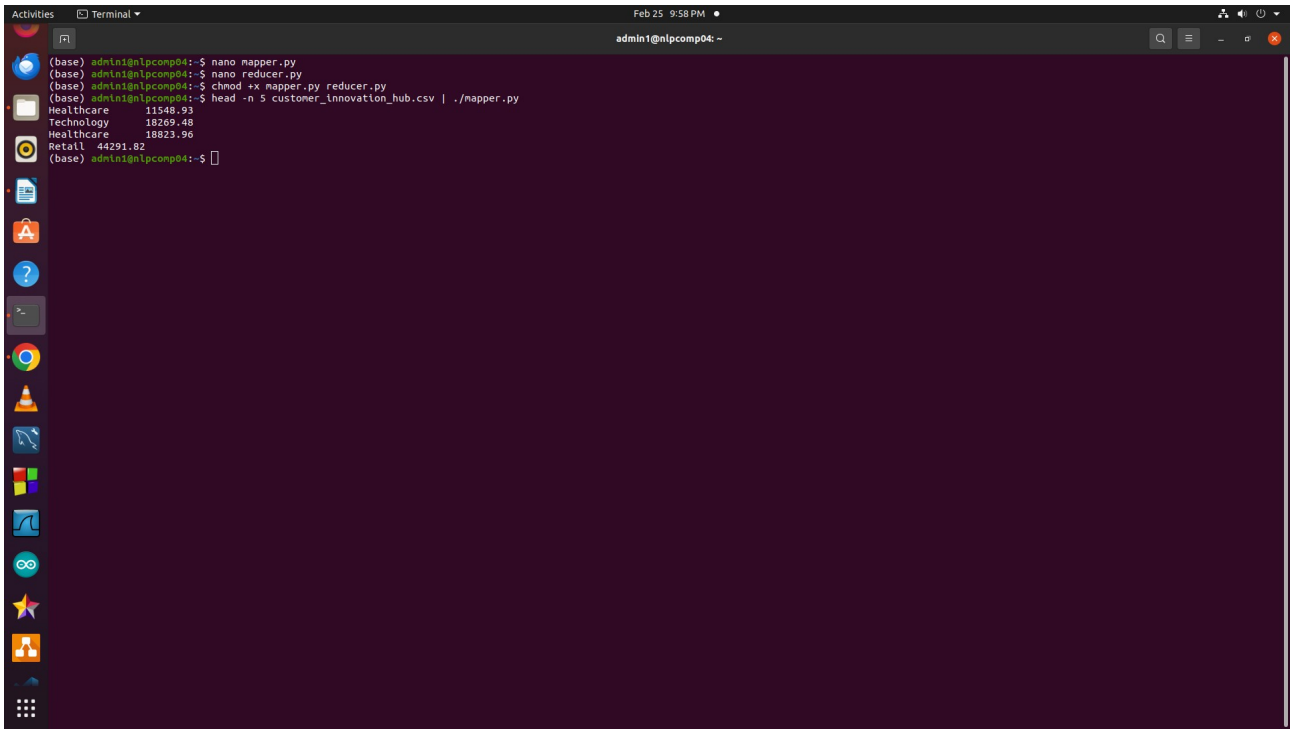
```
(base) admin1@nlpcomp04:~$ hdfs dfs -mkdir /bi_data
(base) admin1@nlpcomp04:~$ hdfs dfs -put customer_innovation_hub.csv /bi_data/
(base) admin1@nlpcomp04:~$ hdfs dfs -ls /bi_data
Found 1 items
-rw-r--r--   1 admin1 supergroup     302888 2026-02-25 21:54 /bi_data/customer_i
nnovation_hub.csv
(base) admin1@nlpcomp04:~$
```

STEP 3: Create Mapper and Reducer

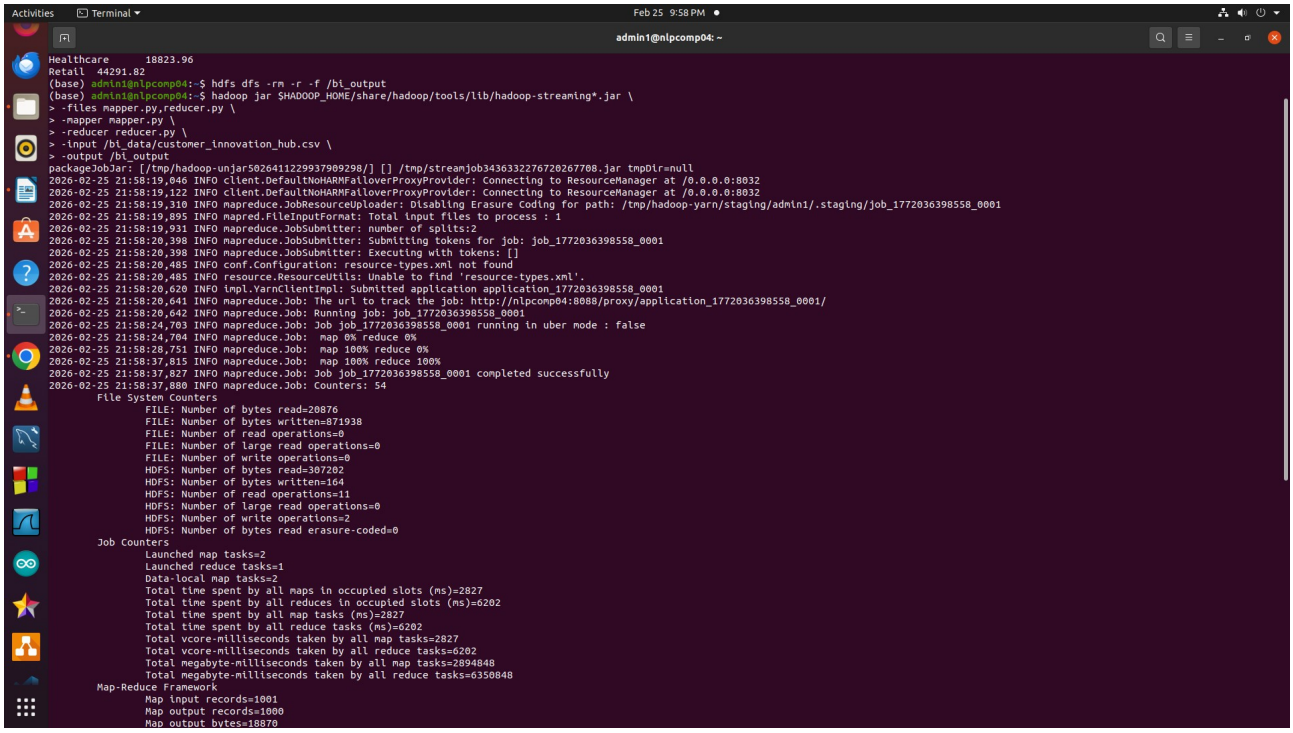


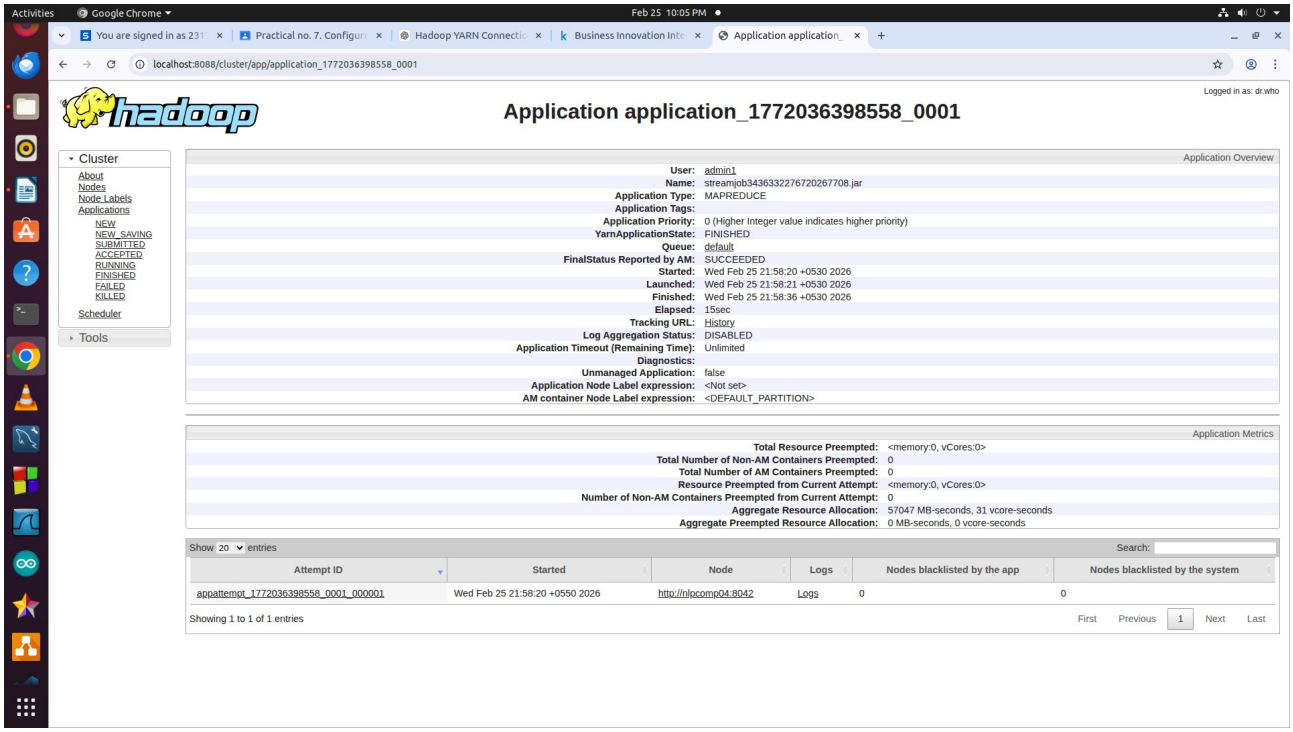


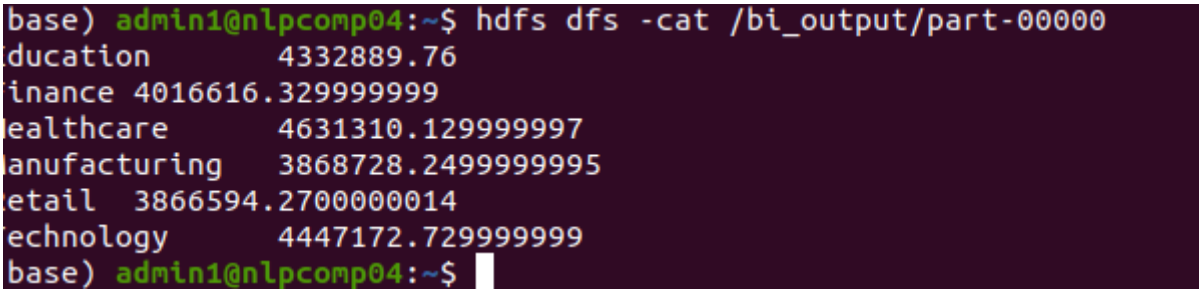
STEP 4: Test Mapper Locally



STEP 5: Run Hadoop Streaming Job







STEP 6: View Final Output
